

# *Friends of NIOSH*

Chairman Tom Harkin  
Senate Appropriations Subcommittee on  
Labor, HHS, Education  
Washington, DC 20510

Ranking Member Jerry Moran  
Senate Appropriations Subcommittee on  
Labor, HHS, Education  
Washington, DC 20510

Dear Chairman Harkin and Ranking Member Moran:

As Congress considers funding priorities for Fiscal Year 2015, the *Friends of NIOSH* strongly urges you to include at least the Fiscal Year 2014 program level of \$332.86 million for the National Institute for Occupational Safety and Health (NIOSH). NIOSH is the primary federal agency responsible for conducting research and making recommendations for the prevention of work-related illness and injury. NIOSH provides national and world leadership to avert workplace illness, injury, disability, and death by gathering information, conducting scientific research, and translating this knowledge into products and services. NIOSH supports programs in every state to improve the health and safety of workers.

The Friends of NIOSH is a coalition of industry, labor, professional, education and scientific organizations that are dedicated to research and prevention of occupational injuries and illness and committed to the training of occupational health and safety professionals. Our broad coalition of stakeholders understands the value of research, education and occupational illness prevention from many perspectives, including the labor, academic and business communities. It is with our shared support for occupational research, education and prevention programs that we urge you to preserve funding for the National Institute for Occupational Safety and Health.

The health and safety of the American workforce is a shared goal of all of our organizations. Many of our members are employed in high risk occupations. Rather than accept that working requires individuals to place their health and well being at risk, we believe strongly that all occupations can be made safer through research, education and training.

NIOSH understands these needs and has developed programs like the Education and Research Centers (ERCs) and the Agriculture, Forestry and Fishing Program (AFF) to meet the needs of the American work force. The elimination of these NIOSH supported programs as proposed in the President's fiscal 2015 budget, would limit the ability of workers to avoid exposures that can result in injury or illnesses, push back improved working conditions, eliminate occupational safety and health educational services to over 10,000 U.S. businesses, and ultimately raise health care costs.

In order to maintain the health and safety of the American workforce, we ask that you include at least the Fiscal Year 2014 level of funding for the National Institute for Occupational Safety and Health (NIOSH) in the Fiscal Year 2015 Labor, Health and Human Services Appropriations bill. Thank you for your consideration of this request.

Sincerely,
